

INTRODUCTION

Skin sags and wrinkles as we grow older—it's a fact of life and an effect of a depleting amount of collagen. We've found the perfect technology to counter just that.

TIME RESET by Thermage is a radiofrequency treatment that promotes collagen and elastin production for smoother, tighter, and better defined skin as well as a long-lasting youthful glow.

No needles, no surgery, no downtime—just instantly, significantly younger-looking skin.

NON-INVASIVE

No surgery or needles involved

ALL YOU NEED IS ONE

A single treatment can produce outstanding, immediate, visible results—in fact, the maximum number of times we recommend that you avail of this treatment is twice a year

QUICK & EASY

The treatment is designed to deliver maximum results within a single session without any hassle and with minimal discomfort

LITTLE TO NO DOWNTIME

Aside a little redness and minor swelling that go away in 24 hours or less, there are no side effects to the Time Reset by Thermage

LASTING RESULTS

Results from one session can for last 6-12 months with results continuing to gradually improve over time

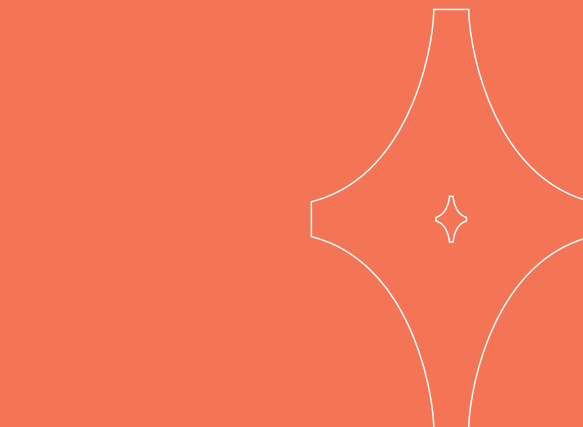

WHAT YOU SEE IS WHAT YOU GET

No special follow-ups are required

HIGHLIGHTED PROS ✦

WHAT IT IS?

Time Reset by Thermage is a non-invasive procedure that uses radiofrequency technology to heat the deep, collagen-rich layers of the skin. The heating process causes existing collagen to contract and encourages the growth of new collagen cells resulting in instantly visible anti-aging effects that get even better with each passing treatment. This treatment is ideal for battling wrinkles, erasing fine lines, and lifting sagging skin but is also great for general smoothing and contouring. A single session goes a long way with natural-looking results that continue to gradually improve, reaching their peak at 2-3 months after.

IS IT SAFE?

Yes! The Thermage device has been in use since 2002, when it was first cleared by the FDA. It's a non-invasive procedure with an impressive safety record to date. Side effects are generally mild--swelling, redness, and bumps for example—and typically last no longer than 24 hours.

HOW LONG IS THE PROCEDURE?

Eyes	90-120 minutes
Face	120 minutes
Neck & Face	120-180 minutes

HOW OFTEN SHOULD I GET ONE?

For a glow that lasts, we strongly recommend scheduling your Time Reset by Thermage every six months.

WHAT'S THE PROCEDURE LIKE?

Before anything else, we go through the regular steps of every procedure we have to make the most out of your #Glowtime. That means that we cleanse, moisturize, extract impurities, and disinfect your skin. Once that's done, the special measures for Time Reset by Thermage are taken.

Areas of improvement are temporarily marked on the skin as a guide for where to apply the therapy. A special pad is then placed on your back to complete the circuit of radio frequency energy.

Using a handpiece with a smooth, flat tip, Thermage's radiofrequency technology is gently applied to the previously marked areas. The radiofrequency tightens and smoothens the skin as it stimulates existing collagen as well as promotes collagen production.

Once you're done in about an hour or two, our signature sunscreen is applied. From here, you're all set to go and glow out!

WHAT SHOULD I EXPECT?

More often than not, all it takes is one session to see the difference that Time Reset by Thermage can create—reduced creases and hooding around the eyes; softer lines and wrinkles; and a well-defined jawline, among others. While the effects are guaranteed to be immediately visible, the newly produced collagen will keep working its magic so that skin gradually continues to get better over the course of 2-3 months. Results may last about a year, based on the patient's natural aging process. Ideally, the process is then repeated in six months to encourage even more tightening.

WHAT DO I DO AFTER MY TREATMENT?

Sit back and relax for a little more #Glowtime or carry on with your day as you normally would, Glow-getter! No special care is needed post-procedure

Bright young thing
